# Java Developer

Presented by Asadullah (19SW62)
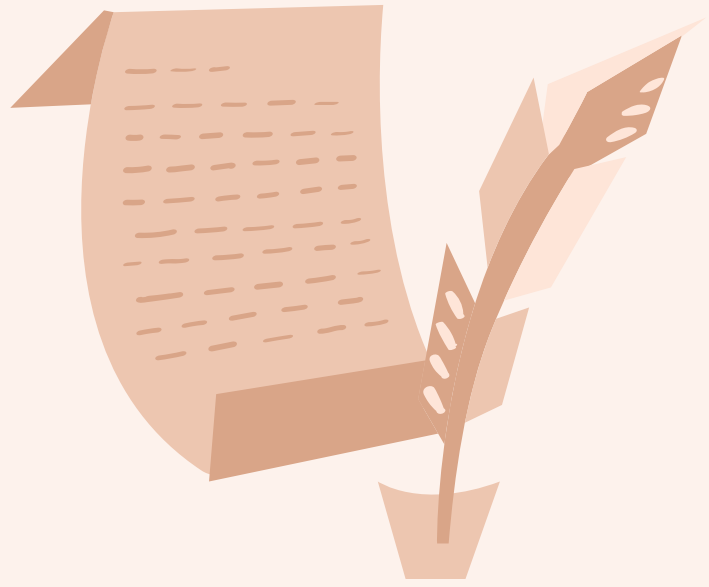

Introduction

I am Asadullah currently pursiuing the Bachelor's degree in Software Engineering. I have chosen Java Language as my career language to be a good backend developer

Overview

The one who used java as backend language for developing large applications(Enterprise application)
are generaaly known as java backend developer

Why did i like java ?

I like java, because in java we have to use logics, we have to integrate data using different algorithms, playing with database, making the system efficient and secure using java.

Why chose Java ?

Popular language famous for using as a backend language.
Makes application secure , robust , scalable, and stable.
Now a days frame-works have also made it more simple.

Achievements

JAVA CORE

Java core has made me able to use efficient techniques for coding in java

JAVA EE

Java EE is used for building web application simply fundamental language

SPRING CORE

A frame-work which makes our code easy to maintain and provide easiness.
